

Animal Road Safety

Tips to stay safe

Pay attention to animal crossing signs.

Remain focused on the road, scanning for hazards, including animals.

Avoid distractions, like devices or eating, which might cause you to miss seeing an animal.

Be extra careful from dusk to dawn. These are the highest risk times for collisions when animals are on the move and driver visibility is affected.

Always buckle up, every trip, every time.

Use your high beams, when possible, to see farther.

Brake if you can, but avoid swerving, which could result in a more severe crash.

Some wild animals move in herds, so if you see one, there are likely more.
